Objective

Computer Science graduate student seeking a challenging role to apply acquired knowledge and theoretical foundations to analyze a complex computing problem and to apply principles of computing to create and collaborate in emerging computing technologies across various disciplines.

Education

St. Joseph Engineering College   *Mangaluru, Karnataka*
Bachelor of Engineering in Computer Science & Engineering   *2021 – Present*
CGPA: 9.43 (upto 5th semester)

St. Aloysius College   *Mangaluru, Karnataka*
12th Grade PCMC   *2019 - 2021*
99%

St. Joseph High School   *Mangaluru, Karnataka*
10th Grade   *2016 - 2019*
96.16%

Skills

Languages: Python, HTML5, CSS, MySQL, Java, JavaScript, Shell Scripting
Database: MySQL
Developer Tools: Git, Postman, VS Code, Android Studio, Linux/Ubuntu, Docker
Frameworks: Flask, Bootstrap, React, Express.js

Work Experience

LCode Technologies Private Limited   *Mangaluru, Karnataka*
Android Software Developer Intern   *Oct 2023 –Nov 2023*

- Dived into the world of mobile app development, working on android Studio. Honed my skills in Java, Android Studio, UI/UX design, and gained valuable insights into Android app development with Java.
- Crafted a fun Tic-Tac-Toe Game, robust Login and Sign-up interfaces for mobile applications.

Projects

Movie Recommender System | P*ython, MySQL, Tkinter*

- Developed a Movie Recommendation system with a user-friendly GUI using Tkinter, integrating a MySQL database to handle all queries and demonstrate CRUD operations.

Blog Post website | *HTML, CSS, Bootstrap*

- Developed a blog platform that allows users to register, create their own blog posts, and comment on existing posts

Python Job Seeker Bot | *Python, Selenium*

- Developed a Selenium-based automation script designed to help find Python developer jobs on LinkedIn with easy apply functionality
- It automates the process of signing in to LinkedIn, searching for Python developer jobs in India, and applying for them with ease.

Certifications

Programming for Everybody (Getting Started with Python)
Google Cloud Computing Foundations
